Purefloor 8	1331 x 194	8	AC5	Class 32	2,32
Purefloor 7		7	AC4	Class 31	2,58

## Certifications

### Environmental Product Declaration

Document that communicates the environmental impact of a material during its life cycle, from the raw material extraction process, transport to the manufacturing plant and product manufacturing process.

### Cradle to Cradle

Multi-attribute certification, directly linked to Sustainable Development Goals (SDGs), demonstrating that a product is safe and circular.

### The Material Health Certificate

This is a materials analysis based on the Cradle to Cradle standard health assessment methodology. This certification seeks to promote healthier and safer products.

### Forestry Certifications

#### PEFC

PEFC chain-of-custody certification provides a verified and independent guarantee that products with the PEFC label contain certified forest material from sustainably managed forests.

#### FSC®

We have implemented a FSC® chain of custody certification system that allows us to supply certified wood products to customers which are 100% recyclable and contribute greatly to the fight against climate change. This forestry certification promotes certified wood, and to this end we certify our farms and help our suppliers achieve certification.

### EUTR

As a sign of transparency, we voluntarily certify compliance with EU regulation 995/2010 regarding the legal origin of wood.

### ISO 38200

This is an internationally recognised standard for the transmission of information along the supply chain of wood and wood-derived products.

## Sustainable building certifications

### BREEAM, LEED, WELL and LBC

Our wood solutions help meet the requirements of sustainable building certifications.
