Modules

Pro

Professional series of kitchen modules that offer a wide variety of sizes, options and items that allow you to fit it into any project

Main features

Baseboard

Fimoplast Moisture Resistant 16 mm, with a double-sided design and finish

Edge

Front section in 1 mm PVC, others in 0.4 mm PVC

Back

Fimoplast Standard 6 mm, White on both sides or design/kraft

Assembly

Allen assembly screw + Wooden peg

Packaging

Shrink wrap with MR identification

Technical specifications

Machining for MRden hanger
*Hangers not included

Suitable for 40/50 mm fin
* Legs not included

Rear recess with space for sockets, pipes and ventilation

Ø5 mm holes for hinges

Anti-roll Rack holder

More information

Manufactured on a 16 mm Fimoplast Moisture Resistant baseboard, it has excellence performance in humid environments. This quality of board offers an advantage in terms of hardware anchorage and flex. The melamine coating allows easy cleaning, is scratch resistant and has an antibacterial surface.

Worktops

Fintop+

Kitchen worktop developed as a horizontal solution to meet the demands of everyday use. It has antibacterial protection and features a decorative design on the top, back side and insulating back edge. The technology used in the manufacture of the surface allows the worktop to comply with the tests of the kitchen standard UNE 56875.

Main features

Baseboard

SuperPan® Decor MR 30 mm - 42 kg/ud
SuperPan® Decor MR38 mm - 53 kg/ud

Dimensions

3660x630 mm

Front edge

Double, postformed: 3 mm radius

Other features

Generic back edge
Sealing gasket

Coated counterface
Protected with film

Comments

The diverse range of colours and options also allows this product to be used for other applications such as: work tables, catering furniture, etc. Availability of:

- Edge banding of each design to finish off the sides.
- Aluminium profiles for straight and corner joints.
- Worktop connection fittings
- Possibility of manufacturing counters

Profiles

More information

Range of kitchen worktops developed based on our exclusive SuperPan®, MR which gives the product high impact resistance, superior cutting quality for perfect joints and greater resistance to humid environments.

It is available in two thicknesses, 30 mm and 38 mm, providing a feeling of firmness and robustness. The entire Fintop+ range is supplied postformed on the front, giving it an image of continuity and avoiding joints that accumulate dirt.

Thanks to the technology used in the melamine coating, we can offer products with designs and textures similar to natural materials that are suitable for contact with food, easy to clean, resistant and equipped with an antibacterial treatment.

We have made a selection of decorations that incorporate exclusive designs for all tastes. Most of the items are from our Duo range, which greatly facilitates combinations with fronts and finishes, as well as using the same tones in projects with shared spaces such as kitchens that open out onto a living room.

We also manufacture counters on request.

To ensure the longest possible service life, Fintop+ worktops come with a coated counterface and edged back. We also incorporate a sealing gasket on the front to prevent water dripping into the furniture.

Finishes

Moa

A beaded stone-effect texture, matt and soft to the touch. It has a homogeneous structure that blends perfectly with various kinds of decors: cements, limestone, granite, terrazzo, rusty, etc.

Balm

Super-matt texture and a pleasant warm touch that resists fingerprint stains effectively. Balm is a very versatile finish, which works perfectly with single colours, metallic textures or marble without dulling the intensity or colours of the décor.

Antiq

Very deep texture with rustic brushed wood effect. It has a touch of warmth and a matt appearance. Its homogeneous structure is very versatile and can be combined with smooth woods as well as with rustic and planked woods.

Worktops

Fintop Xtrim NEW

A range of worktops manufactured using an exclusive HDF board and especially developed for horizontal application, thanks to our innovation, we achieve excellent performance and high performance and excellent hardness, which allows Xtrim worktops to be used intensively.

Main features

Core board

High performance HDF 13 mm - 27 kg/unit

Size

3660 x 630 mm

Front side edging

Double postformed: 5 mm radius

Other features

Overlaid underside
Protective film

Comments

Manufactured using an exclusive HDF board and especially developed for horizontal application, thanks to our innovation, we achieve excellent performance and high performance and excellent hardness, which allows Xtrim worktops to be used intensively. It complies with the tests of the kitchen standard UNE 56875.

Worktops

Fintop SQ

Main features

A range of straight-edged worktops that combine an ultra-resistant SuperPan® MR stand with a range of decorative elements that add a modern look to the kitchen design. Easy to clean, resistant to moisture and with antibacterial surface, has edges and splashbacks to match.

Baseboard

SuperPan® Decor MR 38 mm - 53 kg/ud

Dimensions

3660 x 630 mm

Edge

ABS edge of 1 mm, guaranteeing an elegant and contemporary look in every kitchen. They have a coated back side and a generic edge on the back.

Comments

The combination of designs and textures from the range on the ultra-resistant SuperPan® MR baseboard makes our Fintop SQ worktop an ideal solution for any of your projects. The ABS edge and PUR gluing, which provide greater heat and wear resistance than other materials, offer maximum guarantees for daily use. In addition, the technology used in the manufacturing of the surface allows the worktop to meet the tests of the UNE 56875 kitchen standard.

Availability of

- Splashbacks available
- Edges in rolls to finish the projects to measure
- Edge effect test available in some designs
- Hardware for joining worktops
- Possibility of manufacturing counters

More information

SuperPan® is a board composed of wood fiber faces and a core of agglomerated wood particles. It is an innovative solution patented by Finsa, which we exclusively manufacture through a continuous pressing process. This technique gives it great performance for different industrial technologies, as it combines the main advantages of MDF and particle boards. The MDF faces allow worktops made with SuperPan® to have greater impact resistance.

For our Fintop SQ range, we use the MR quality to provide maximum guarantees in humid environments.
